In this handbook

01	Welcome to RIX Intel	03
02	Why RIX Intel exists	04
03	Who it's for	05
04	What you'll find inside	06
05	How RIX Intel works	08
06	Premium	09
07	Principles	10
08	Useful links	11

Welcome to RIX Intel

RIX Intel is a market intelligence platform for traders, investors, and curious learners. It is built for people who want to genuinely understand financial markets and crypto rather than simply chase trades.

The platform puts education first. It was not built to tell anyone what to buy. It was built to help people understand how markets work, develop stronger fundamentals, build real conviction, and make better decisions through research. Better decisions come from better understanding, not shortcuts.

Money follows knowledge.

RIX Intel is built around that idea.

Why RIX Intel exists

Modern markets move fast. The information needed to understand them is scattered across dozens of websites, dashboards, social feeds, and research platforms. Each shows one fragment of the picture. None shows the whole.

Under that pressure, most people end up consuming headlines instead of building understanding. They see the reaction but never the reasoning. They know what moved, but not why it moved or what it means for what comes next.

RIX Intel exists to close that gap. It organizes scattered information into structured research: written to be understood, designed to be learned from, and kept in one calm place.

Not more information.

Better organized understanding.

Who it's for

RIX Intel is written for anyone who treats markets as a subject worth studying, whatever their starting point.

- ✓ **Crypto investors** who want context behind price
- ✓ **Long-term investors** building positions on fundamentals
- ✓ **Active traders** refining process and structure
- ✓ **Beginners** learning markets from first principles
- ✓ People drawn to **macro, on-chain data, market structure, and trading psychology**
- ✓ People who prefer **learning** over blindly following calls

What you'll find inside

Research on RIX Intel is organized into desks. Each desk is a focused area that teaches a different dimension of the market. Together they form the complete picture.

DESK Market Structure How price actually moves: trend, range, liquidity, and key levels. The foundation for reading any chart with clarity.	DESK Trading Setups Structured trade ideas documented before the outcome, with the reasoning, the invalidation, and the lesson either way.
DESK Crypto Journal An ongoing record of the market as it unfolds. What happened, what mattered, and how the thinking evolved over time.	DESK On-Chain What blockchains reveal that charts can't: flows, holder behavior, and network activity, translated into plain language.
DESK Macro Rates, liquidity, and the global forces that move every market. The backdrop most crypto analysis ignores.	DESK Infrastructure The systems crypto runs on: chains, scaling, and the technology decisions that shape where value settles.
DESK AI × Crypto Where two accelerating fields meet, studied for substance and separated from narrative.	DESK Web3 Protocols, ecosystems, and applications: what they do, how they sustain themselves, and why it matters.
DESK NFTs Digital assets and ownership beyond speculation: the mechanics, the markets, and the lessons in between.	DESK Economic Calendar The scheduled events that move markets, and the context to understand why they matter before they happen.

LIBRARY

Educational Articles

Concepts explained from the ground up. Written to be understood the first time, and to still be useful years later.

LIBRARY

Research Journals

Deeper written research on a single question: the full reasoning, the evidence, and the conclusion.

LIBRARY

Charts

Annotated charts that show the analysis, not just the outcome. Every marking teaches something about how to read the next one.

LIBRARY

Market Observations

Shorter notes on what stands out right now: the details worth noticing before they become the story.

IN DEVELOPMENT

Future Desks

RIX Intel grows deliberately. New desks are added when they can be covered properly, not before.

Every desk shares the same standard: publish the reasoning, keep the record, and make it teachable.

How RIX Intel works

RIX Intel is designed to be read, not monitored. It rewards a simple daily rhythm that compounds quietly over months.

MORNING

Start with the reading

Open the latest research before opening a chart. A few calm minutes of context change how the entire session is interpreted.

THROUGH THE DAY

Follow developing narratives

Markets are stories that unfold over weeks. RIX Intel tracks those narratives as they develop, so movements read as chapters rather than noise.

WHEN CURIOUS

Go deeper on one question

Use the research and educational desks to properly understand a concept like market structure, a macro mechanism, or an on-chain metric, one at a time.

LOOKING BACK

Review previous journals

Everything published stays published. Rereading past research against what actually happened is one of the fastest ways to learn how markets behave.

OVER TIME

Let knowledge compound

No single article changes everything. Consistent reading does. Understanding built this way holds up when conditions change, because it was never borrowed.

Premium

A large part of RIX Intel is public and always will be. Premium exists for readers who want to go further.

What Premium unlocks

Premium provides access to the deeper layer of the platform's research, the work that takes the most time to produce.

- ✓ **Deeper research.** The full analysis behind the public summaries.
- ✓ **Exclusive journals.** Extended market records and reasoning.
- ✓ **Subscriber-only publications.** Research released only to members.

Premium follows the same philosophy as everything else here: research and education, not signals or promises. Subscribe if the depth is useful to you.

Principles

Everything RIX Intel publishes is measured against a short set of principles. They rarely change, because they don't need to.

01 **Understand before acting.**

02 **Research before conviction.**

03 **Learning compounds.**

04 **Markets reward preparation.**

05 **Knowledge is a long-term edge.**

06 **Education comes before execution.**

None of these are shortcuts. That is the point. Markets are generous to people who prepare and unforgiving to people who guess. Preparation is the one edge that never stops working.
